

NueroSpectral Regulation is a solution for light-triggered headaches and migraines. Our proprietary technology utilizes individualized spectral filtering to alleviate photophobia and stress on the brain, reducing migraine frequency and improving visual processing.

Research Backed

Based on over 40 years of research on light sensitivity, visual stress and migraine

Drug Free & Non-invasive

Provides relief without negative side-effects, drug interactions, or unwanted visual changes

Preventative Care

For light-triggered headache and migraine, whether hereditary or after head injury

Regulates the Brain

Regulates neural activity at the intersection of the visual and pain pathways in the brain

Unique to Your Needs

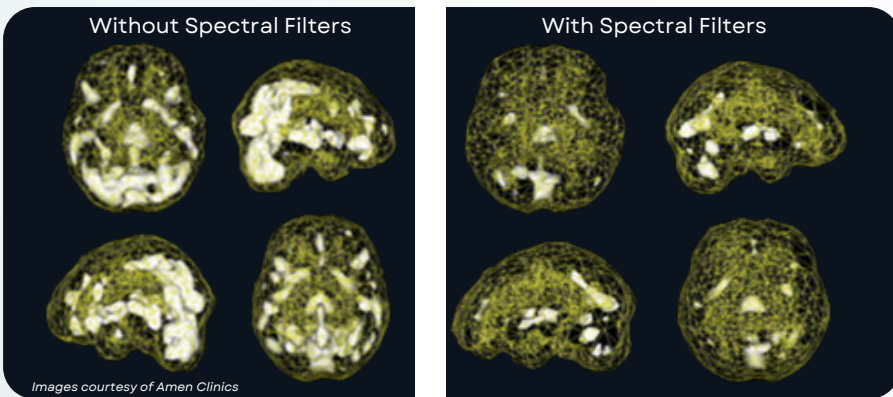

Uniquely formulated color for your individual brain that does not color or darken vision

Highly Effective

74% reported no migraines after wearing individualized spectral filters

Without Spectral Filters

With Spectral Filters
